

ReStreet

PLAYER GUIDE • VERSION 2.0.6 ONLINE BETA

FIFA Street (2012) on your PC, step by step

How to install ReStreet, keep it up to date, set up the launcher, play online with friends and fix the most common problems. No technical knowledge needed: just follow the numbers.

- | | | | |

| 1 | What you need | 5 | First start: PLAY |
| 2 | Download the setup | 6 | Updating |
| 3 | The Windows warning | 7 | Launcher settings & friends |
| 4 | Install ReStreet | 8 | Problems & help |

1

What you need

Check these four things before you start. If you have them all, the whole install takes about 15–30 minutes.

**Your own FIFA Street ISO**

An Xbox 360 disc image (.iso) of **FIFA Street (2012)** that you own. ReStreet does not include the game.

**Windows 10 or 11 (64-bit)**

Any normal home PC with Windows 10 or Windows 11, 64-bit.

**About 12 GB free**

Free space on the drive where you will install the game (for a new install).

**An Internet connection**

To download the setup (≈ 450 MB), for updates and to play online.

Recommended PC

PART	WHAT WORKS WELL
System	Windows 10 or 11, 64-bit
CPU	x86-64 processor; a quad-core is safest
GPU	Graphics card with Direct3D 12 or Vulkan and up-to-date drivers
RAM	8 GB
Disk	about 12 GB free for a new install
Game	your own FIFA Street (2012) Xbox 360 ISO

These are estimates from testing, not guarantees.

Never share ISOs or game files — not on Discord, not on GitHub, not anywhere. Do not ask other players for them either. Everyone must use their own copy.

The **setup window is in English**. This guide shows each English button in **yellow**, so you always know what to click. The launcher can be shown in your language.

2 Download the setup

ReStreet comes as one single file: the setup. Download it only from the official GitHub page.

- 1 Open this address in your browser:
github.com/samuelit0davila/fifa-street-pc-port/releases/latest
- 2 Scroll down to **Assets** and click **ReStreet-x.y.z-Setup.exe**. The download is about 450 MB. **x.y.z** is the version number: always take the release marked **Latest**, even if its number is newer than the one in this guide.
- 3 Wait until the download finishes. The file goes to your **Downloads** folder.

ReStreet vx.y.z — ONLINE BETA Latest

▼ Assets	4
 ReStreet-x.y.z-Setup.exe ≈ 450 MB ← this one	
 ReStreet-x.y.z-Setup.exe.sha256	optional (check)
 Source code (zip)	not needed
 Source code (tar.gz)	not needed

Simplified drawing of the GitHub release page: your page shows the newest version number instead of x.y.z. Click only the Setup.exe file.

Optional: check that the file is not damaged

You can skip this. It only confirms the file arrived complete and is the original one.

- 1 Also download **ReStreet-x.y.z-Setup.exe.sha256** and open it with Notepad. It contains a long code.
- 2 Press **Start**, type **PowerShell**, open it and paste this line, then press **Enter**:

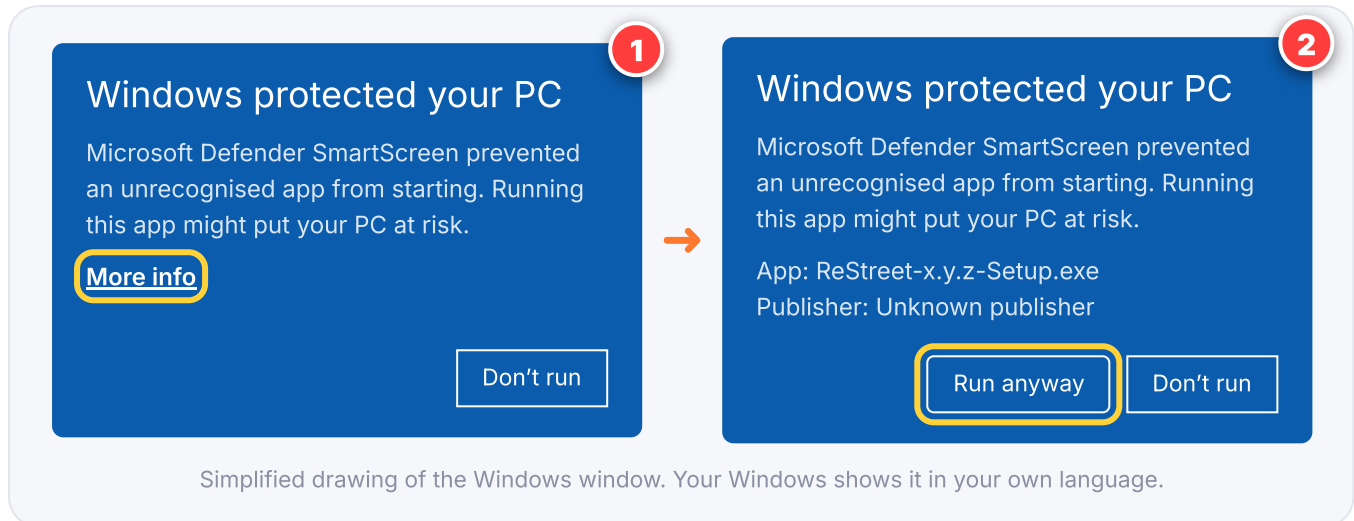

```
Get-FileHash "$env:USERPROFILE\Downloads\ReStreet-*--Setup.exe"
```
- 3 Compare the **Hash** shown with the code in the .sha256 file. If they are the same, the file is perfect. If not, download it again.

Do not download ReStreet from other websites, YouTube links or files sent by strangers. The only official place is the GitHub page above (also linked from the website and the Discord).

3 The Windows warning (SmartScreen)

When you open the setup for the first time, Windows may show a blue window saying it “protected your PC”. This is normal for new programs from small projects.

- 1 Double-click **ReStreet-x.y.z-Setup.exe** in your Downloads folder.
- 2 If the blue window appears, click the small link **More info** (1).
- 3 A new button appears: click **Run anyway** (2). If Windows asks “Do you want to allow this app to make changes?”, click **Yes**.

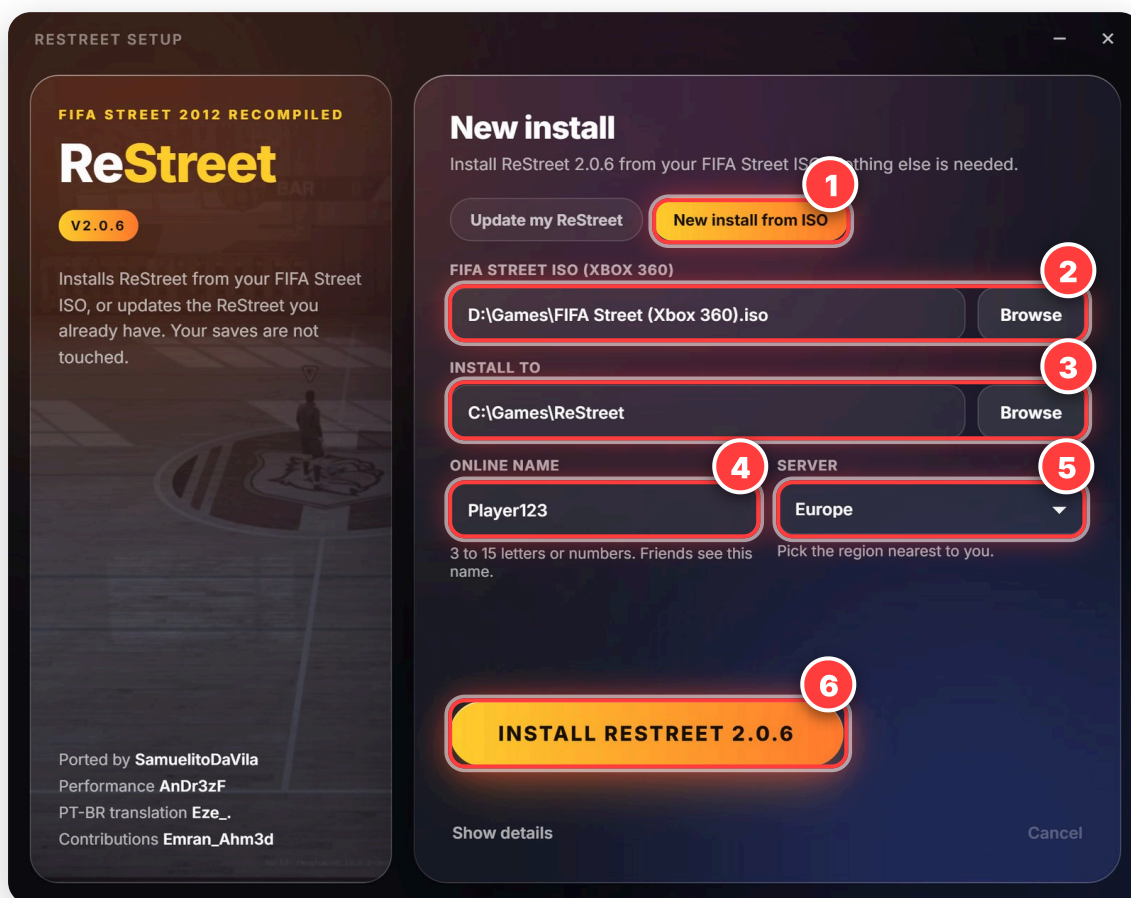

Why does this happen? The setup is not signed with a paid certificate, so Windows does not know it yet. Only do this for the file you downloaded from the official GitHub page.

If your antivirus deletes or blocks the setup, restore it from the antivirus quarantine or add an exception, then try again. Download it again if the file is gone.

4 Install ReStreet

The setup opens. Fill in the fields in this order, then press the big button.

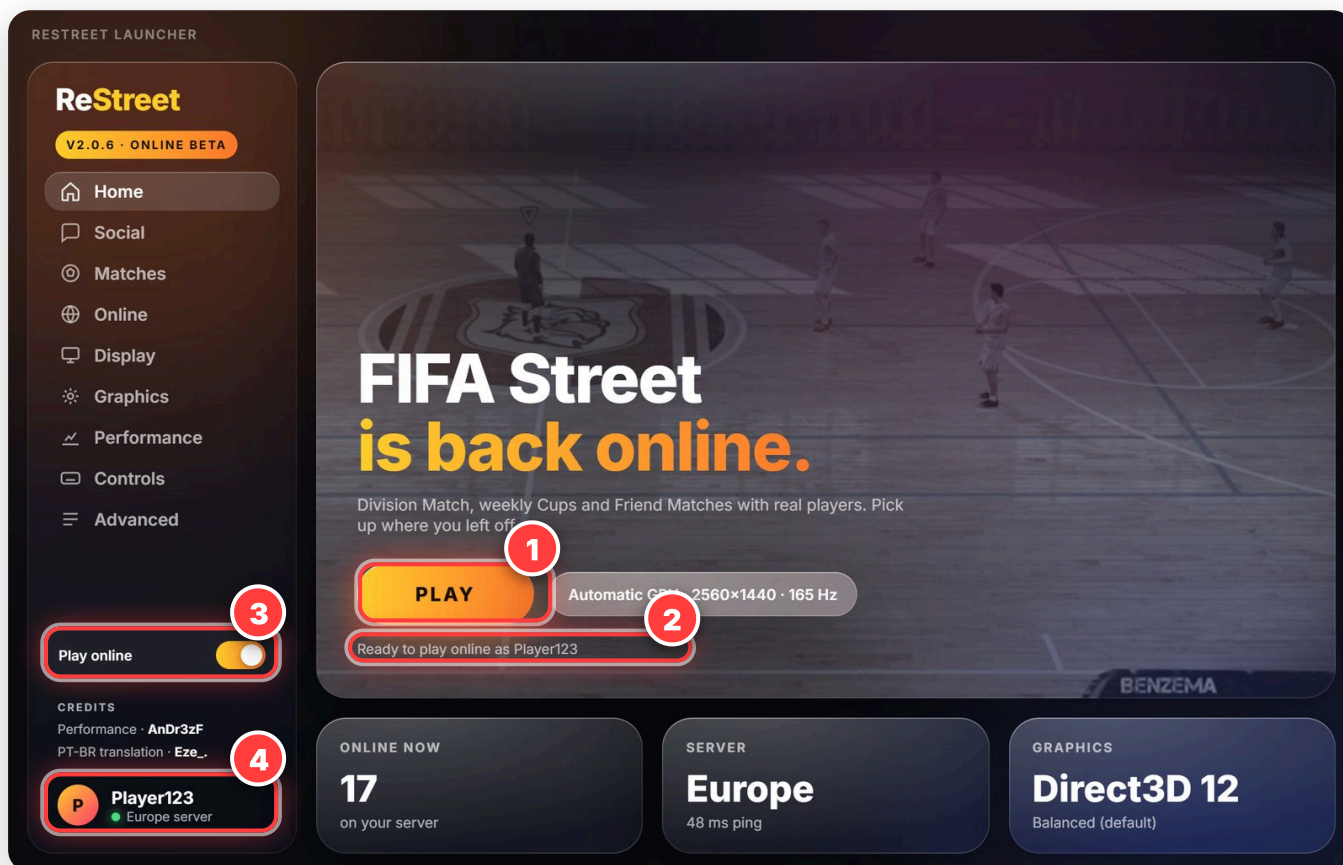

- 1 Click **New install from ISO** (you are installing for the first time).
- 2 **FIFA STREET ISO (XBOX 360)** — click **Browse** and choose your FIFA Street .iso file.
- 3 **INSTALL TO** — the folder where ReStreet will live, for example `C:\Games\ReStreet`. Use a new or empty folder with about 12 GB free.
- 4 **ONLINE NAME** — the name your friends will see: 3 to 15 letters or numbers, no spaces.
- 5 **SERVER** — choose **Europe** or **South America**: the one nearest to you. Friends must be on the same server to play together.
- 6 Press **INSTALL RESTREET x.y.z** and wait. It can take several minutes: the game files are created from your ISO. Do not close the window.

✓ When it finishes, the message says ReStreet is installed. The button becomes **OPEN LAUNCHER** and a **ReStreet shortcut** is placed on your desktop. You can keep or delete the ISO afterwards: the game no longer needs it.

5 First start: press **PLAY**

From now on you always start the game from the launcher: double-click the ReStreet shortcut on your desktop.

- 1 **PLAY** — starts the game. The first start can take a little longer.
- 2 The line under the button shows the status, for example *“Ready to play online as Player123”*.
- 3 **Play online** — leave it on to play online. Switch it off only to play offline.
- 4 Your online name and your server.

The first matches on a new PC may stutter a little while the game prepares its graphics (“shaders”). This gets better on its own after a few matches.

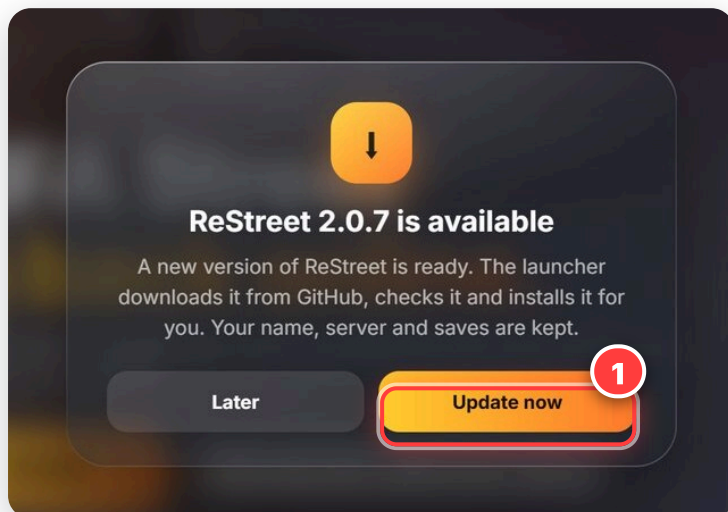

The launcher language and the game language are chosen in **Display** (see page 9).

6 Updating ReStreet

How you update depends on the version you have now. You can see your version at the top left of the launcher (for example **V2.0.6 · ONLINE BETA**).

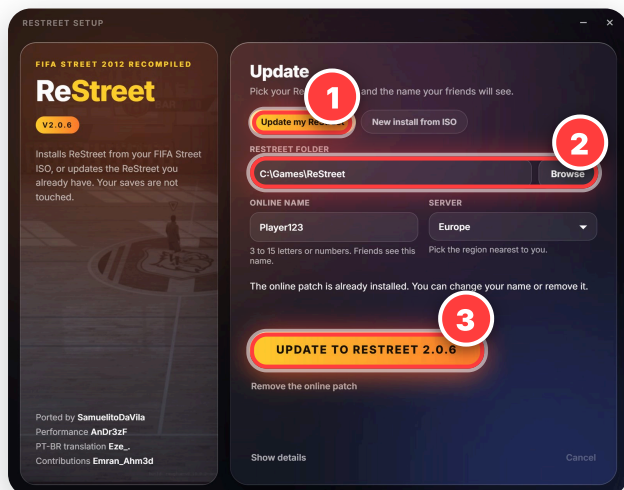

A — You have version 1.5.1 or newer

- 1 Open the launcher. When a new version exists, a window says *"ReStreet x.y.z is available"*.
- 2 Press **Update now** (1). The launcher downloads the update from GitHub, checks it and installs it.
- 3 Wait: the launcher closes and opens again by itself. Done!

✓ Your **name, server, settings and World Tour saves** are kept. Pressing "Later" just closes the window; you will be asked again next time.

B — You have an older version (before 1.5.1)

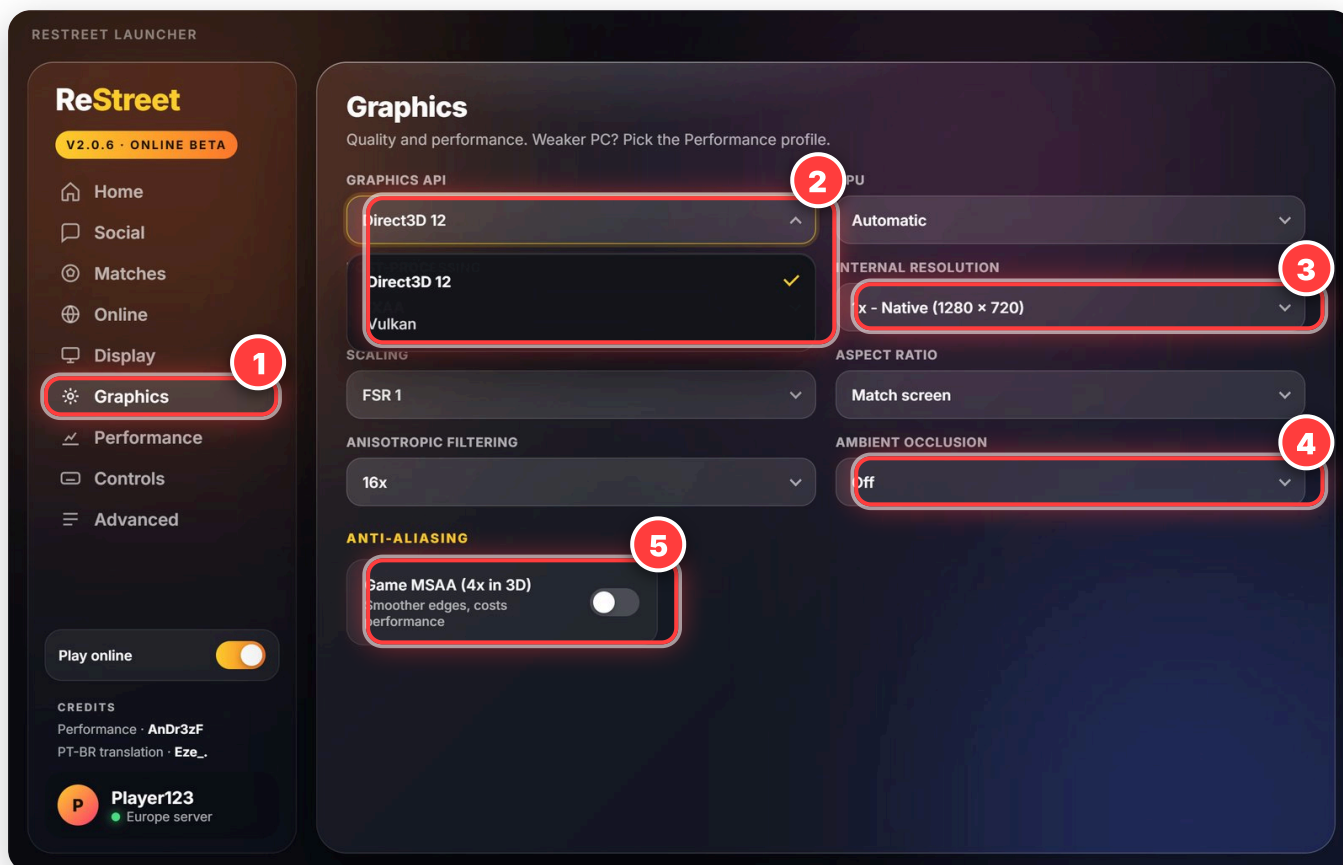

- 1 Download and open the new setup (pages 3–4). Choose **Update my ReStreet** (1).
- 2 **RESTREET FOLDER** — click **Browse** and pick the folder where ReStreet is now (the one with `FifaStreetLauncher.exe`) (2).
- 3 Check your online name and server, then press **UPDATE TO RESTREET x.y.z** (3).

No ISO is needed to update. Saves, settings and your online name are kept. After this, future updates use the **Update now** button (A).

7 Launcher settings: Graphics

Most players never need to change anything. If the game is slow or closes by itself, these are the settings that matter.

1 Click **Graphics** in the menu on the left.

2 **GRAPHICS API** — **Direct3D 12** or **Vulkan**. Direct3D 12 is the safe choice for most PCs. If one does not work well on your PC, try the other.

3 **INTERNAL RESOLUTION** — **1x - Native** is the lightest. 2x–4x look sharper but need a stronger graphics card.

4 **AMBIENT OCCLUSION** — nicer shadows. Choose **Off** on a weaker PC.

5 **Game MSAA (4x in 3D)** — smoother edges but costs performance. Leave it off on a weaker PC.

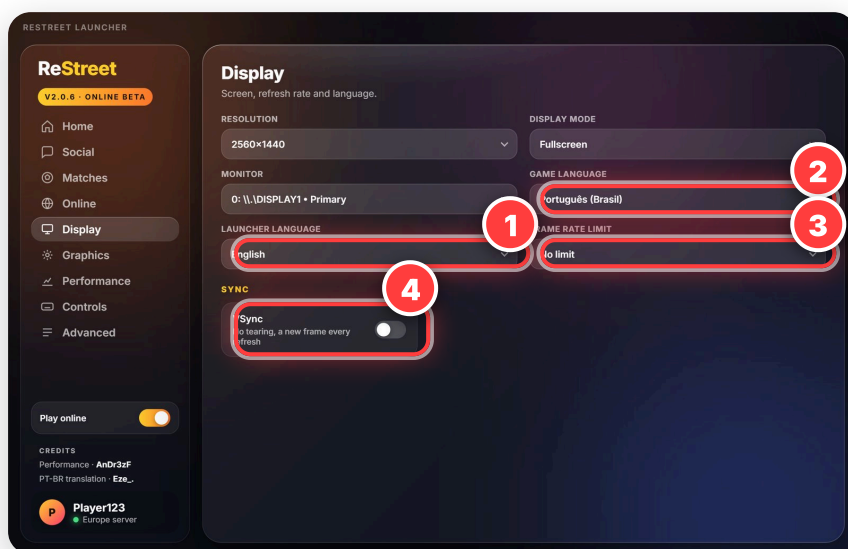

AMD (Radeon) graphics card? Use Direct3D 12. Vulkan can crash in the AMD driver. Vulkan can also have small stutters on any card.

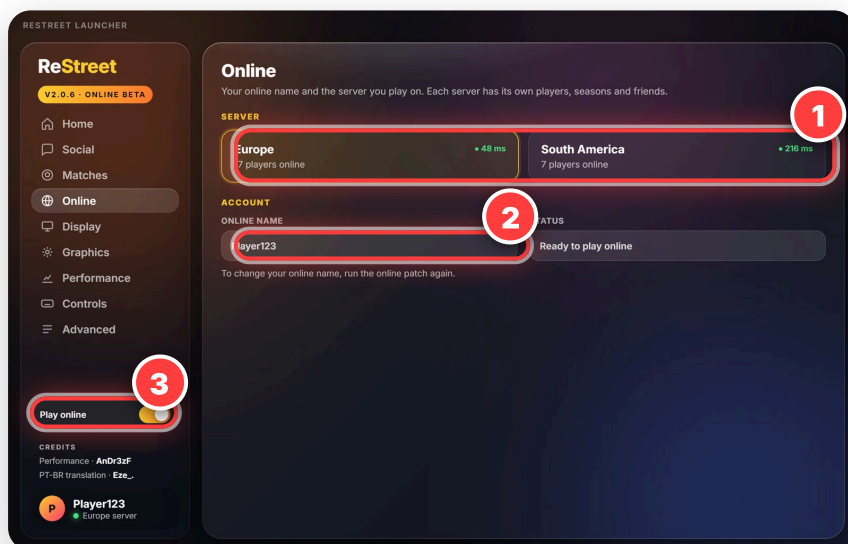

Weaker PC or laptop? Use the "Performance" settings: Internal resolution **1x - Native**, Ambient occlusion **Off**, Game MSAA **off**. If the PC has two graphics chips, choose the dedicated card in **GPU**. Also keep your graphics driver up to date.

Display: screen and language

- 1 **LAUNCHER LANGUAGE** — the language of the launcher.
- 2 **GAME LANGUAGE** — the language of the game menus.
- 3 **FRAME RATE LIMIT** — limit the FPS if the PC gets hot or noisy.
- 4 **VSync** — removes “tearing” lines on screen; turn it on if you see them.

Online: server and name

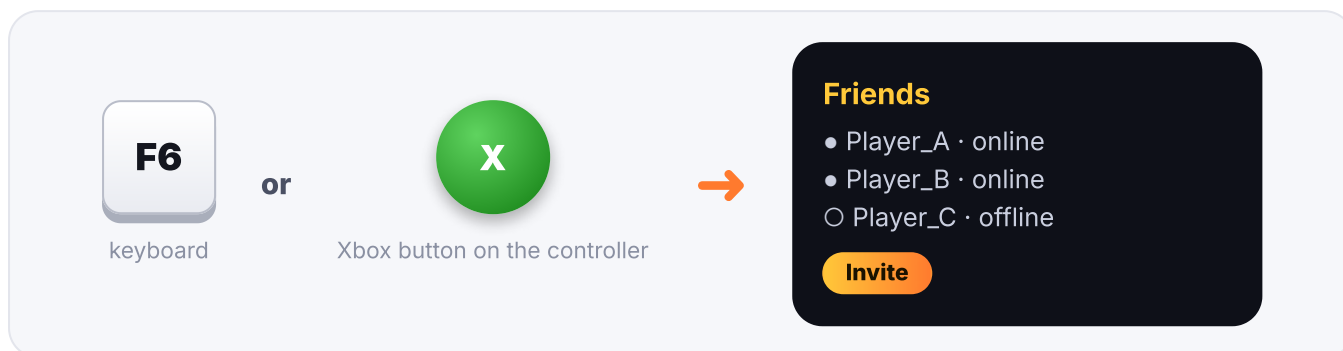

- 1 **SERVER** — click **Europe** or **South America**. Lower “ms” = faster connection.
- 2 **ONLINE NAME** — your name. To change it, run the setup again (Update my ReStreet).
- 3 **Play online** — must be on to play online.

Players, friends and leaderboards are **separate on each server**. To play with a friend, both of you must choose the same server.

Friends: the in-game Guide (F6)

During the game you can see your friends and invite them to play, without leaving the game.

Invites

WHAT	KEYBOARD	CONTROLLER
Open / close the Guide		Xbox (Guide) button
Accept an invite		
Decline an invite		

Add friends and play together from the launcher

- 1 In the launcher, open **Social**. Add a friend by name with the + button. Accepted friends appear in **Friends**; new invitations appear in **Requests**.
- 2 The chat is also on the **Social** page. Be nice: the chat is moderated.
- 3 In **Matches** you can post a match or join one. Keep the game closed: when someone joins, ReStreet opens for both of you straight into the match lobby.

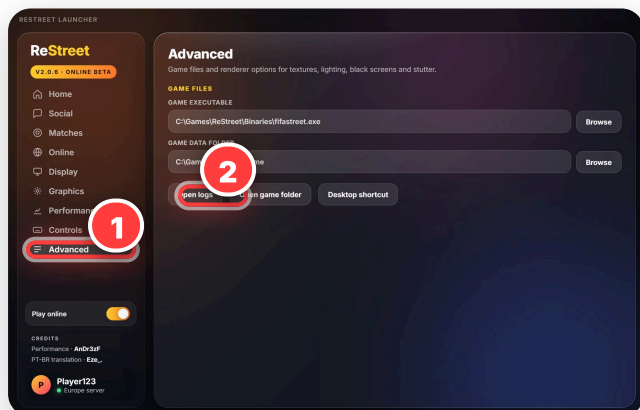

Known limits: a launcher room does not pull a player out of another lobby (leave that lobby first). Two copies of the game on the same PC can lose the connection after an invite; on different PCs it works.

8 Problems and solutions

Try the solution in the right column first. Most problems are solved in a minute.

PROBLEM	WHAT TO DO
Blue window “Windows protected your PC”	Normal for the setup. Click More info → Run anyway (page 4).
The game closes or crashes on an AMD card	In Graphics choose Direct3D 12 instead of Vulkan, and update the AMD driver.
The game is slow or stutters	Use the weak-PC settings (page 8): Internal resolution 1x, Ambient occlusion Off, MSAA off. The first matches on a new PC stutter while shaders are built.
The game runs on the wrong (integrated) graphics	In Graphics → GPU pick your dedicated card, or in Windows Settings > Display > Graphics set FifaStreet to <i>High performance</i> .
The setup does not accept my ISO	It must be the Xbox 360 ISO of FIFA Street (2012) , complete and not compressed (.iso, not .zip/.rar).
I cannot see my friend online	Check that you are both on the same server and that Play online is on.
The update failed	Close the game, open the launcher again and press Update. If it still fails, run the new setup and choose Update my ReStreet .

Where are the logs? (needed when you report a problem)

- 1 Open **Advanced** in the launcher menu.
- 2 Click **Open logs**: the folder with the log files opens. **Open game folder** opens the ReStreet folder.

Your ReStreet folder (e.g. C:\Games\ReStreet)

```

├─ FifaStreetLauncher.exe
├─ Binaries
│   └─ crash_motivo.txt ← only after a crash: why it closed
├─ Logs
│   ├── fifastreet.log ← what the game did
│   └─ launcher_settings.txt ← your launcher settings

```

Asking for help

Still stuck? Ask on Discord or open an issue on GitHub. The more you tell us, the faster we can help.

Discord

<https://discord.gg/CqjYMGKyy2>

The community and the developer. Best place for quick questions.

GitHub Issues

<https://github.com/samuelit0davila/fifa-street-pc-port/issues>

For bugs: click "New issue" and describe the problem (needs a free GitHub account).

Send this with your message

- ❑ Your ReStreet version (top left of the launcher), Windows version, processor (CPU), graphics card (GPU) and RAM.
- ❑ Graphics API (Direct3D 12 or Vulkan) and your launcher settings.
- ❑ What happened, and how to make it happen again (step by step).
- ❑ The logs: `Binaries\Logs\fifastreet.log` and `launcher_settings.txt` (button **Open logs**).
- ❑ If the game crashed: `Binaries\crash_motivo.txt`.

Never share ISOs or game files — not in messages, not in issues, not in screenshots of download links. Only send the log files listed above.
